

DESCRIPTION/SPECIFICATIONS

Acousti-Jac MFV (Mass Filled Vinyl) is a composite product consisting of our popular 1# MFV, direct laminated to a foil barrier and bonded to aluminum with a double faced visco-elastic adhesive film. This process produces a superior product which can be used in outdoor applications or in situations where a protective barrier is needed.

1# MFV is supplied in 36" wide rolls and sheets.

- Alloys:
- Aluminum 3003, 3105
 - Stainless Steel T304, T316
 - Galvanized
 - Galvalume upon request.

Finishes: Smooth or Stucco Embossed

Thicknesses: Aluminum - .020" through .040"
Stainless Steel - .010" through .032"

Widths: 36"

Lengths: 36' Rolls or in Sheet form Cut to length sizes

Colors: Standard colors available (See color chart)
Special colors upon request (Minimums apply)

APPLICATIONS

Acousti-Jac has been utilized by design engineers along with fibrous and cellular insulation(s) as an effective treatment in reducing industrial and commercial noise sources such as:

- Equipment
- Piping
- Ductwork
- Vibration and damping treatment
- Other Noise control applications

Increased noise reduction can be achieved using multiple layers of 1# MFV.
