

DESCRIPTION/SPECIFICATIONS

Acousti-Jac MFV (Mass Filled Vinyl) is a composite product consisting of our popular 1# MFV, direct laminated to a foil barrier and bonded to aluminum with a double faced visco-elastic adhesive film. This process produces a superior product which can be used in outdoor applications or in situations where a protective barrier is needed.

1# MFV is supplied in 36" wide rolls and sheets.

Alloys:	<ul style="list-style-type: none">• Aluminum 3003, 3105• Stainless Steel T304, T316• Galvanized• Galvalume upon request.
Finishes:	Smooth or Stucco Embossed
Thicknesses:	Aluminum - .020" through .024" Stainless Steel - .010" through .020"
Widths:	36"
Lengths:	36' Rolls or in Sheet form Cut to length sizes
Colors:	Standard colors available (See color chart) Special colors upon request (Minimums apply)
	<ul style="list-style-type: none">• <i>Other gauges available on request</i>• <i>Subject to change without notice</i>

APPLICATIONS

Acousti-Jac has been utilized by design engineers along with fibrous and cellular insulation(s) as an effective treatment in reducing industrial and commercial noise sources such as:

- Equipment
- Piping
- Ductwork
- Vibration and damping treatment
- Other Noise control applications
