

DESCRIPTION/SPECIFICATIONS

RPR Products-White Steel Strapping is manufactured from continuous hot-dipped zinc coated steel. The bare steel is first physically and chemically cleaned and pre-treated, primer coated and finally top coated with a modified silicone polyester paint. This paint system features outstanding exterior durability and superior non-chalking and gloss retention properties..

The banding is a commercial quality product for use in light to medium duty applications.

White Steel Strapping is supplied in ribbon wound coils. Oscillated coils available upon request. Minimums may apply.

Thickness: .020" (.5mm)
Width: ¾", 1.0", 1.5" and 2.0"

APPLICATIONS

The product is used in metal building applications to support insulation and vapor barrier on the underside of roofs and inside wall purlin wind bracing.
